

FIG. 1

FIG. 1 is a schematic diagram of a device 10, likely a battery or power source, showing a top view. The device has a rectangular body 20 with rounded corners. A central rectangular region 26 is divided into four quadrants by dashed lines 51 and 53. The quadrants are labeled 52 (top-right), 54 (bottom-right), 56 (top-left), and 58 (bottom-left). A horizontal dashed line 55 and a vertical dashed line 57 intersect at the center. The device is surrounded by a frame 23. Four circular terminals are located at the corners: 44 (top-left), 45 (top-right), 41 (bottom-right), and 43 (bottom-left). Four curved leads extend from the corners: 33 (top-left), 34 (top-right), 31 (bottom-right), and 32 (bottom-left). A label 27 points to the left side of the central region, and a label 28 points to the right side of the central region. A label 29 points to the top edge of the device, and a label 21 points to the bottom edge. A label 22 points to the left edge, and a label 24 points to the right edge. A label 25 points to the top-right corner area. A label 2 points to the bottom-left corner area. A label 10 points to the top edge of the device.
